Foreign Travel Immunizations

Franklin County Public Health does not provide international travel vaccinations including those needed to prevent Yellow Fever, Typhoid and Malaria medications.

Please note: Currently there is a **limited** supply of Yellow Fever vaccine in the United States. Because of a total depletion of YF-Vax, the manufacturer (Sanofi Pasteur) has worked with CDC and the US Food and Drug Administration to make an alternative yellow fever vaccine, Stamaril, available at select locations until YF-Vax supply returns, which is expected by the end of 2018.

Refer to the CDC's website to learn about health information related to your destination.
